

What is Special About our Super-Z-Lite Liquid?

Liquid Super-Z-Lite is formulated with our exclusive, concentrated zeolite extract visibly present in our bottles for all to see and taste which is unlike other zeolite products on the market all of which are almost clear liquids. This carbon-bonded mineral complex enables Super-Z-Lite liquid extract to be produced with the use of pure water alone without the use of hazardous solvents. Super Z-Lite liquid is also preserved naturally without the use of harmful chemicals.

What is Special About our Super-Z-Lite Capsules?

When these mineral complexes are incubated and bonded together they can be encapsulated without the need for magnesium and calcium stearate (compacting agents) compounds potentially detrimental to human health.

Why Super-Z-Lite Capsules and Liquid Extract

We recommend Super-Z-Lite capsules and the liquid extract be taken concurrently. The liquid begins its action in the lymphatic system immediately and while the capsules are utilized when they reach the intestines. Together, these products maximize their ability to chelate (remove) heavy metals and toxins from the body.

Thus the two Super-Z-Lite supplements together complement each other and together they are the ideal Zeolite system.

In the opinion of Ty M. Bollinger, author of his recent book, **"Cancer, Step Outside of the Box"** suggests the following quotations:

"The zeolite product which is head and shoulders above the rest is called Super-Z-Lite".

*"From my further research, I have concluded that zeolites, especially "Super-Z-Lite" should be a part of everyone's daily supplementation and for patients alike... There is truly no other substance on Earth comparable to **Super-Z-Lite**".*

SUPER-Z-LITE

The Green Zeolite Extract

ALL NATURAL VEGAN DIETARY SUPPLEMENT

Super-Z-Lite

We are constantly being exposed to toxins in our food, water, air and environment. Now is the time to protect ourselves. Chemicals, heavy metals, germs, parasites and radiation attack and damage the organs and cells in our bodies. They eventually lead to loss of energy and declining health. Although it is impossible to avoid these toxins, there is a natural substance you can take to help reduce their presence in your body, namely, zeolite and in particular, Super-Z-Lite. Because this natural volcanic substance produces all these results, it is rapidly approaching the status to deserve the title of "the greatest supplement", it truly manifests detoxification results once considered impossible.

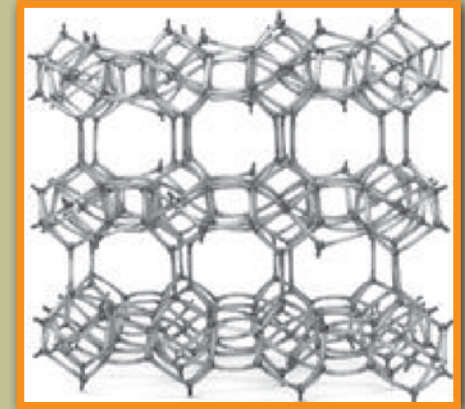

Super-Z-Lite's observable benefits include: but may not be limited to the following:

- **Enhances and balances the body pH to a healthy alkalinity**
- **Removes pesticides, herbicides and radioactive substances from the body.**
- **Breaks down and removes heavy metals, toxins and viruses.**
- **Acts as a powerful antioxidant and boosts natural energy**
- **Corrects metabolic conditions and improves physical performance**
- **Improves nutrient absorption and increases assimilation**
- **Reduces allergic reactions and accelerates hangover recovery**
- **Improves mental function and helps to sustain a better mood**
- **Restores immune system and nourishes healthy cells**

What is Special About Super-Z-Lite?

While many may try to replicate our zeolite products our special manufacturing techniques of temperature control, vortexing and extraction methods set Omica Health products apart. Our super-charging process activates and transforms the natural volcanic silicate mineral zeolite through the addition of ocean and plant-derived ionic trace minerals combined with natural acids to become a highly bio-available and potent complex.

Unlike many supplements, our production processes use no chemicals, solvents, fillers, excipients, compactors or additives. To bond through a chemical reaction of inorganic and organic powders into a new potent organic mineral complex is superior to the simple blending of separate powders. Zeolite has been proven to absorb and eliminate from the body heavy metals (particularly lead, mercury, cadmium and arsenic), pesticides, chemicals and radiating substances. Zeolite is one of the few minerals that is negatively-charged. It acts as a magnet to attract positively-charged toxins from the cells.

Zeolite Crystalline Structure

Our exclusive bonding process facilitates the transport of zeolite to penetrate into the remote places thought to be unreachable. At Omica Health we understand the necessity of both organic and inorganic minerals to sustain health. They occur in the body and their interaction is required to repair the continual deterioration of our cells.

Other detox products release toxins in the body, whereas the molecular structure of zeolite appears to be a cage that has the ability to absorb toxins and trap them inside the 'cage'. Eventually, zeolites are eliminated naturally from the body, and harmlessly take the toxins out with them.
